

What is claimed is:

1. A method of redacting content from a document in electronic form, comprising the steps of:
  - selecting a geometric area on the document for redaction;
  - representing said geometric area as one or more annotation objects;
  - identifying information in the document representing content and location and nature of content;
  - representing said identified information as one or more content objects;
  - identifying content having the same geometric location as said annotation objects and creating a file with said identified content removed to produce a redacted document.
2. The method of claim 1, wherein one or more items of information are associated with said annotation object.
3. The method of claim 1, wherein the content is text.
4. The method of claim 1, wherein the redacted text is not found in the redacted document.
5. A method for designating portions of a document for redaction, comprising the steps of:
  - displaying all or a portion of the document;
  - designating a geographic region of the document for redaction;
  - saving the designations with the document.

6. The method of claim 5, further comprising the step of associating one or more codes with each of said designations.

7. The method of claim 5, wherein said step of designating comprises manipulating a frame displayed on the document.

8. The method of claim 5, wherein said step of designating comprises designating all geographic regions containing content selected by a user for batch designation.

9. A storage medium having stored therein a plurality of instructions, wherein the plurality of instructions, when executed by a processor, cause the processor to perform the steps of:

permitting a user to select a geometric area on a document for redaction;

representing said geometric area as one or more annotation objects;

identifying information in the document representing content and location and nature of content;

representing said identified information as one or more content objects;

identifying content having the same geometric location as said annotation objects and creating a file with said identified content removed to produce a redacted document.

10. The storage medium of claim 9, wherein one or more items of information are associated with said annotation object.

11. The storage medium of claim 9, wherein the content is text.

12. The storage medium of claim 9, wherein the text marked for redaction has been removed in the redacted document.

13. A storage medium having stored therein a plurality of instructions, wherein the plurality of instructions, when executed by a processor, cause the processor to perform the steps of:

displaying all or a portion of a document;

permitting a user to designate a geographic region of the document for redaction; and

saving the designation with the document.

14. The storage medium of claim 13, wherein said plurality of instructions, when executed by a processor, cause the processor to perform the further step of associating one or more codes with each of said designations.

15. The storage medium of claim 13, wherein said step of permitting a user to designate comprises permitting a user to manipulate a frame displayed on the document.

16. The storage medium of claim 13, wherein said step of permitting a user to designate comprises permitting a user to select content for batch designation and designating all geographic regions containing said selected content.

17. A system for redacting content from a document in electronic form, comprising:  
means for permitting a user to select a geometric area on the document for redaction;

means for representing said geometric area as one or more annotation objects;

means for identifying information in the document representing content and location and nature of content;

means for representing said identified information as one or more content objects;

and

means for identifying content having the same geometric location as said annotation objects and creating a file with said identified content removed to produce a redacted document.

18. The system of claim 17, wherein one or more items of information are associated with said annotation object.

19. The system of claim 17, wherein the content is text.

20. The system of claim 17, wherein the information to be redacted is not found in the redacted document.

21. A system for designating portions of a document for redaction, comprising the steps of:

means for displaying all or a portion of the document;

means for permitting a user to designate a geographic region of the document for redaction; and

means for saving the designations with the document.

22. The system of claim 21, further comprising means for associating one or more codes with each of said designations.

23. The system of claim 21, wherein said means for permitting a user to designate further comprises means for permitting a user to manipulate a frame displayed on the document.

24. The system of claim 21, wherein said means for permitting a user to designate comprises permitting a user to select content for batch designation and means for designating all geographic regions containing said selected content.
